---

IRRIGATION & CAD (MAJ-X) DEPARTMENT

G.O.Ms No. 125

Dated:09-10-2009

Read the following

G.O.Ms.No.124, Irrigation & CAD (Maj-X) Department, Dated: 09-10-2009.

**ORDER:**

In order to ensure safe disposal of huge flood water resulted due to cyclonic rains in the catchment area of Krishna River Basin several steps taken by the Irrigation & CAD Department. Despite due to huge floods the Irrigation sources have been damaged all along the river systems. The major damages reported are at Sunkesula barrage, Srisailem Project and Krishna Delta System. The Sunkesula barrage across the Tungabhadra River has suffered severe damage occurring to the flash floods of 9.80 Lakhs cusecs against the designed flood of 5.20 Lakhs cusecs on October 2<sup>nd</sup> 2009. The earth bund on left and right flanks have been suffered extensively requires immediate restorations.

2. There have been heavy damages to the irrigation systems during the unprecedented rains from 30.09.2009 to 03.10.2009 resulting in flash floods which surpassed all peaks so far recorded at various locations in Krishna River. Government has decided to restore the systems on war footing basis in order to ensure irrigation and drinking water supplies at the earliest time possible.
3. In the reference read above Government has accorded permission for taking up the works for an amount of Rs.56.90 Crores in different projects for immediate restoration and irrigation supplies for Rabi season 2009-10 and Committee has been constituted as follows.

<b>I</b>	Engineer-In-Chief (Admn)	-	Chairman
<b>II</b>	Engineer-In-Chief (Irrigation)	-	Member
<b>III</b>	Chief Engineer, CDO	-	Member
<b>IV</b>	Advisors to Government	-	Members
<b>V</b>	Deputy Financial Advisor (Finance)	-	Member
<b>VI</b>	Chief Engineer concerned	-	Member/ Convener

4. The following guidelines shall be followed for taking up the immediate restoration works of major & medium irrigation projects.
- a. Detailed assessment of the damages and preparation of the estimates for restoration of damages and entrusting the work to agencies is a time consuming process in the normal course. In order to restore the irrigation systems damaged during the floods of 2009 at the earliest possible time, the following revised procedure is prescribed:
  - b. The concerned Chief Engineer will get a line estimate prepared and present the same before the Committee constituted for general vetting duly proposing a panel of agencies consisting of at least two agencies of proven track record with required men and machinery and having acquaintance with that area for entrusting the work on nomination at estimate rates.
  - c. The Committee after deliberations will authorize the Chief Engineer to proceed with the work to the agency/agencies selected by the Committee.
  - d. The works executed are subjected to regular checks by quality control staff with regard to pre-levels, Final levels and quality aspects.
  - e. During executions, if there are any major deviations, the same shall be brought to the notice of Committee by the concerned Chief Engineer and get them approved.
5. The Engineers-in-Chief and Chief Engineers concerned shall take necessary action accordingly.
